

**Name: SEAS - The Spanish Society of Social and Health Care****Beschreibung**

SEAS - The Spanish Society of Social and Health Care is composed by researchers and professors of the University of Valencia, Spain, with high experience in R&D in the technological, social and health sector and has shown the capability to develop R&D, addressing the knowledge to improve the quality of life of the elder and disabled people. SEAS can provide expertise, knowledge and previous researches and can help to define the stage of the project and in the analysis of the results.

The Spanish Society of Social and Health Care is a non profit organisation located in Spain.

The goals of the entity are the following:

- the protection and defence of rights and interests of dependent people, their families and main carers
- to advise Public Administrations and social and health care private companies
- the promotion of the research and the dissemination of scientific results and knowledge in the area of social and health care
- to provide quality services to companies of this sector validating technologies to support the elder and disabled people

SEAS has experience in research also from a comparative point of view of the health and social systems implemented in different countries, as well as real European examples of good practices to improve the situation of the disabled and dependent people, and therefore contributing to improve the accessibility, adequacy, equity, quality, modernisation and sustainability principles in social and health systems. SEAS remains aware of the needs of dependent and disabled people and develops a very important labour looking for innovative solutions.

TARGET PARTNER PROFILE

We are interested in relevant European Calls, such as:

- VII FP: Health
- VII FP: Socio-Economic Sciences and Humanities - SSH
- AAL: Ambient Assisted Living
- ICT-PSP - The Information Communication Technologies Policy Support Programme
- Leonardo/Grundtvig: Lifelong Learning Programme

Projekte (mit Status)

- 2007 – 2009 LivingAll (implemented) – Free Movements and Equal Living Opportunities for All – funded by DG Research Health in the VI Framework Programme of the European Commission. More info @: <http://www.livingall.eu/index.php>. ISS is participating to the project as a partner.
- SEAS also has contacts with national and European networks focused on the protection and promotion of ageing and disabled rights, and residences for the elder and for disabled people. Besides, SEAS cooperates closely with ISS-Innovaciones Sociosanitarias and the ERI POLIBIENESTAR, University of Valencia, in most of their activities, projects, and international activities.
